Belajar Membuat Aplikasi Back-End untuk Pemula

Maptuhul Ihsan

Backend Developer | Mobile Developer
Pemalang, Jawa Tengah, Indonesia

Ringkasan

As a seasoned Backend Developer & Mobile Developer with over a year of experience, I possess expertise in developing applications using Express.js and Flutter. I have a deep understanding of RESTful APIs, database management (MySQL, PostgreSQL, and NoSQL/MongoDb), and version control using Git and GitLab.

I'm focused on developing scalable, secure, and high-performance systems. I continually strive to enhance code quality and improve development efficiency.
